**Subject:** RE: Washington Reduced Harm meeting

Dear Rick,

This is a great opportunity for us to present our design (and maybe some first data) from the TES/pilot. We suggest to submit 5 posters, all related mainly to the TES (the design and first results from the EHCSS study might be published at other venues first):

(All titles are preliminary; authorship will be determined by coordinators applying our guidelines for authorship.)

1. Selection of biomarkers of exposure for a population study of US adult smokers to cigarette smoke (Coordinator: Kinser) - repeat of Brisbane poster;
2. Biomarkers suitable to determine effects of smoking in smokers (Coordinator: Roethig) - new;
3. Validation of biomarkers for assessing exposure to and effects of cigarette smoke in humans (Coordinator: Kinser) - new;
4. Assessment of exposure to ETS of smokers and nonsmokers (Coordinator: Lau) - new;
5. Design for a population study of exposure of US adult smokers to cigarette smoke (Coordinator: Oey) - repeat of Brisbane poster.

What do you think?

Roger

please let me know what any of you would propose for posters at the biomarkers meeting this fall that Dr. Hatsukami is hosting.

Dear Rick,

Thanks for your comments. We hope to have a meeting on biomarkers in Minneapolis this October. I hope you will attend. I actually am quite interested in learning what you folks are doing in this area.

Dorothy

I wanted to write to you, John Slade, and Scott Leischow to let you know I thought the meeting in Washington was great. The 5 of us that were there from Philip Morris enjoyed it very much. I'm glad to see you are considering making a series out of it. The dialogue was stimulating. I also wanted to mention that in a conversation with Greg Connolly I expressed our willingness in contributing in the future. Greg's reply was that he would support the idea, so I wanted to mention to John Slade, Scott Leischow, and you that I hope you will keep us in mind for future meetings. It seems to me that experts from the relevant industries would be able to contribute in a meaningful way.

I should also mention that the IOM report was a well done piece of work in a very complex area. Congratulations.

Also, please note my email address. The one in the meeting book was incorrect.

Thanks again.

Rick Solana
